

Morbidity & mortality trends in PoC sites, South Sudan (IDSR/EWARN data)

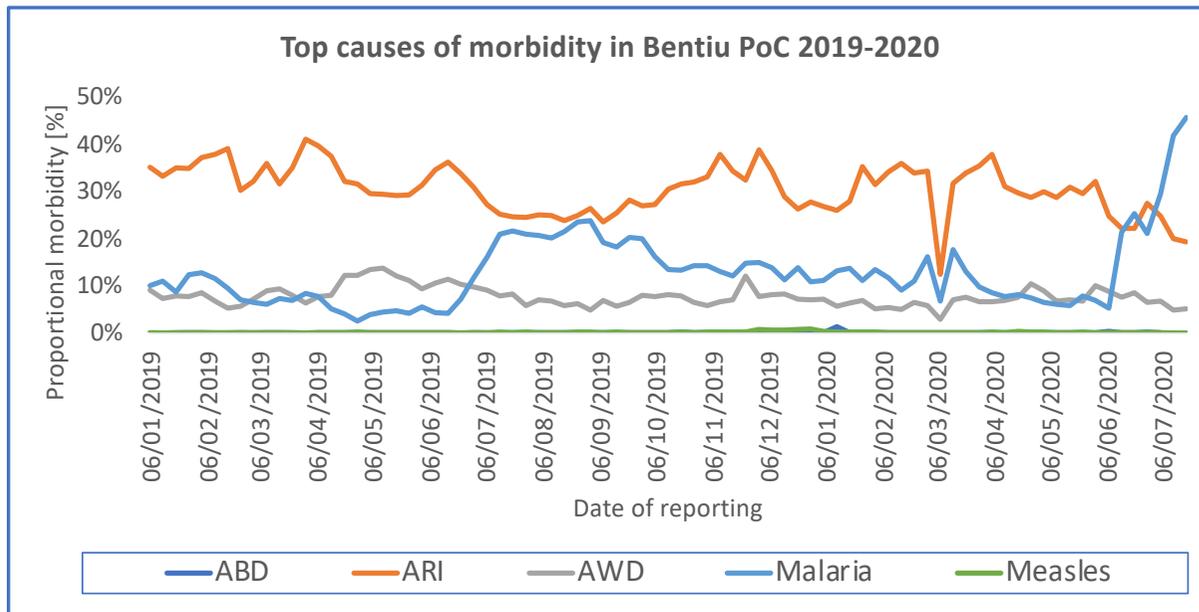

As of week 29, 2020

Ministry of Health
Republic of South Sudan

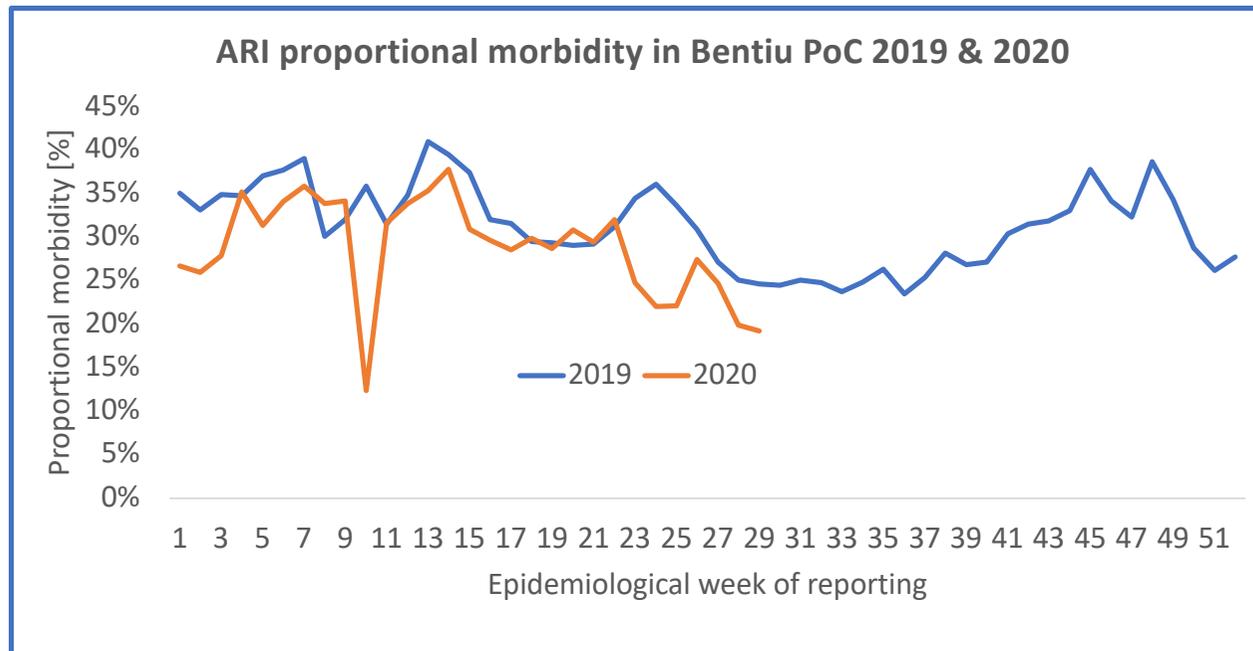

Top causes of morbidity, Bentiu PoC, wk 29, 2020

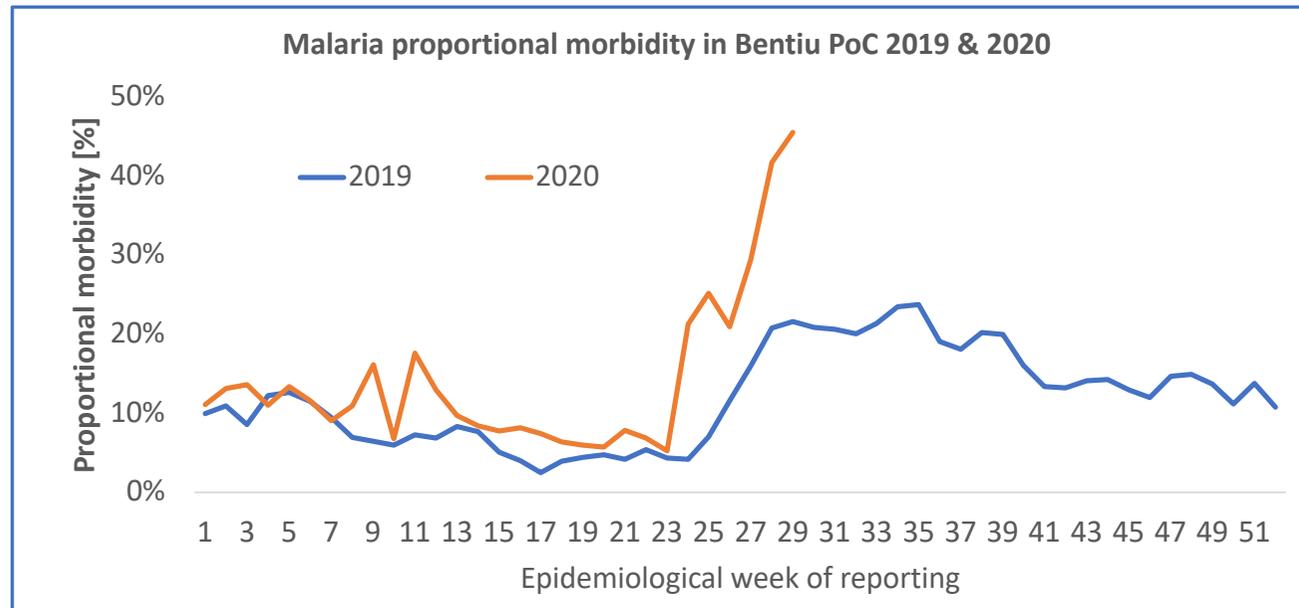

- Malaria remains the top cause of morbidity in Bentiu PoC
- Malaria accounts for 46% of OPD consultations representing a 9.5% increase from week 28, 2020
- ARI proportional morbidity reduced from 20% in wk 28 to 19% in wk 29, 2020
- These proportions may be affected by the current triage of patients at clinics due to the COVID-19 context

ARI trends in Bentiu PoC, 2019-2020

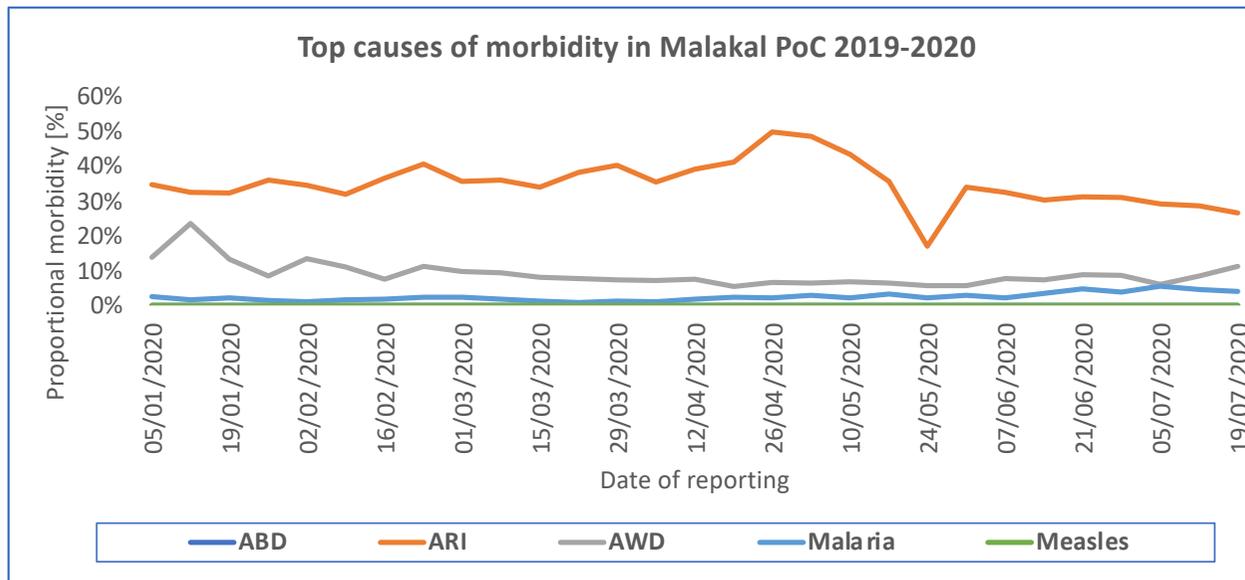

ARI proportional morbidity in 2020 is lower when compared to the corresponding period of 2019

Malaria trends in Bentiu PoC, 2019-2020

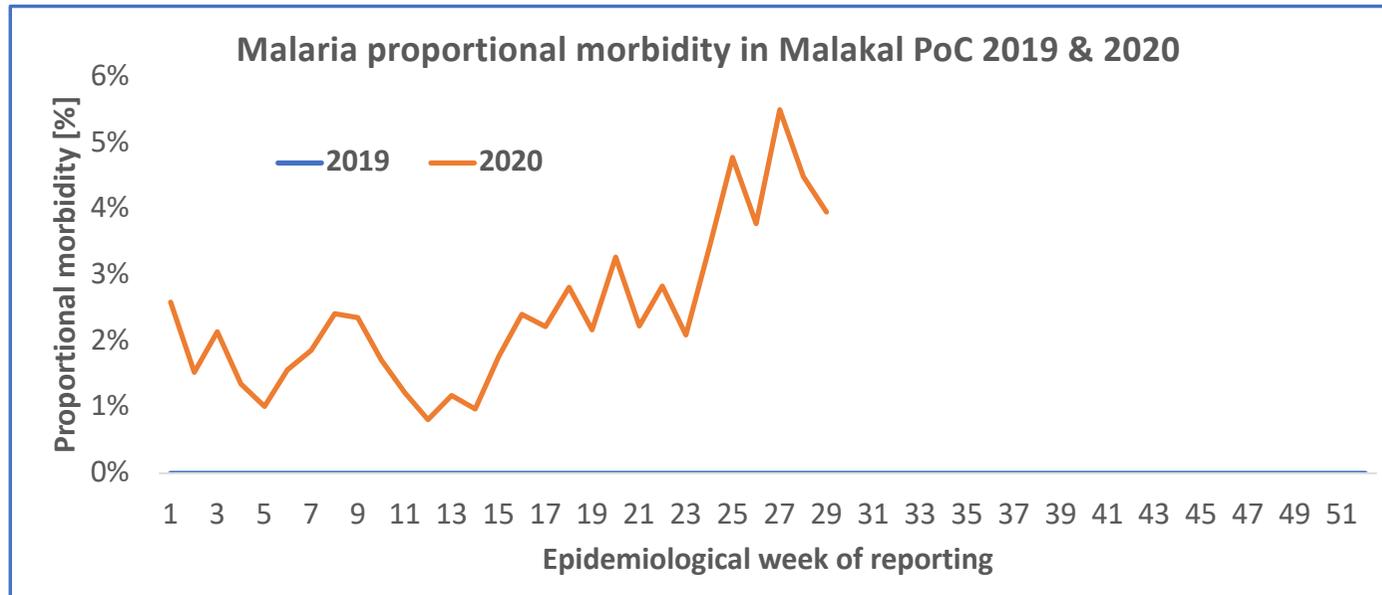

- Malaria started rising earlier (wk23, 2020) when compared to 2019
- Malaria was the top cause of morbidity in wk 29, 2020 and accounted for 46% of OPD consultations

Top causes of morbidity, Malakal PoC, wk 29, 2020

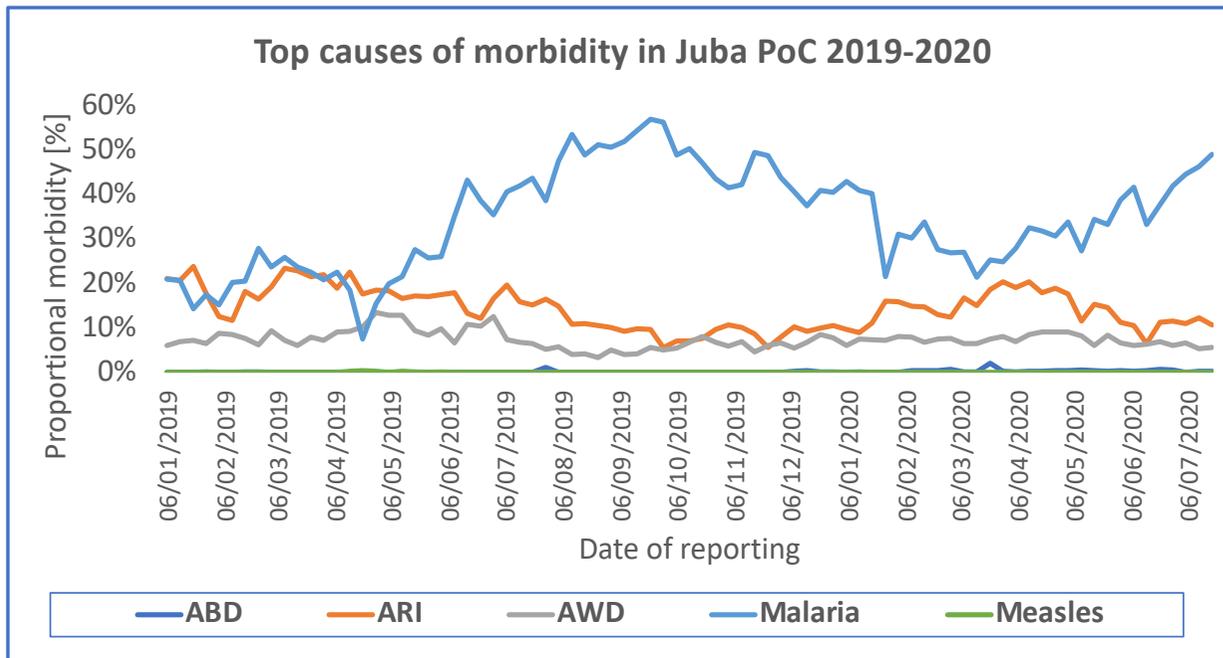

- ARI is the top cause of morbidity in Malakal PoC
- ARI accounts for 26% of OPD consultations and declined when compared to 29% in week 28, 2020
- Malaria proportional morbidity is 4% and has been rising since week 26, 2020

Malaria trends in Malakal PoC, 2019-2020

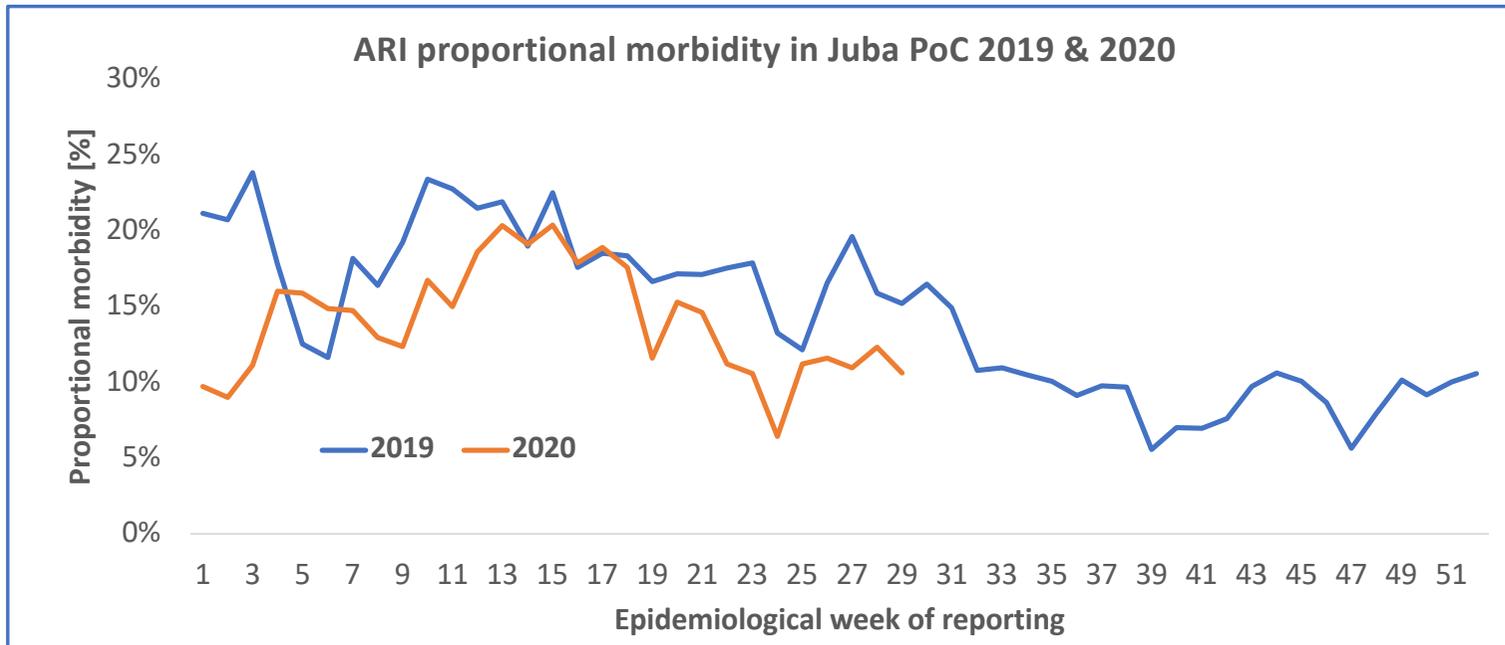

Malaria accounted for 4% consultations in Malakal PoC in week 29 of 2020

Top causes of morbidity, Juba PoC, wk 29, 2020

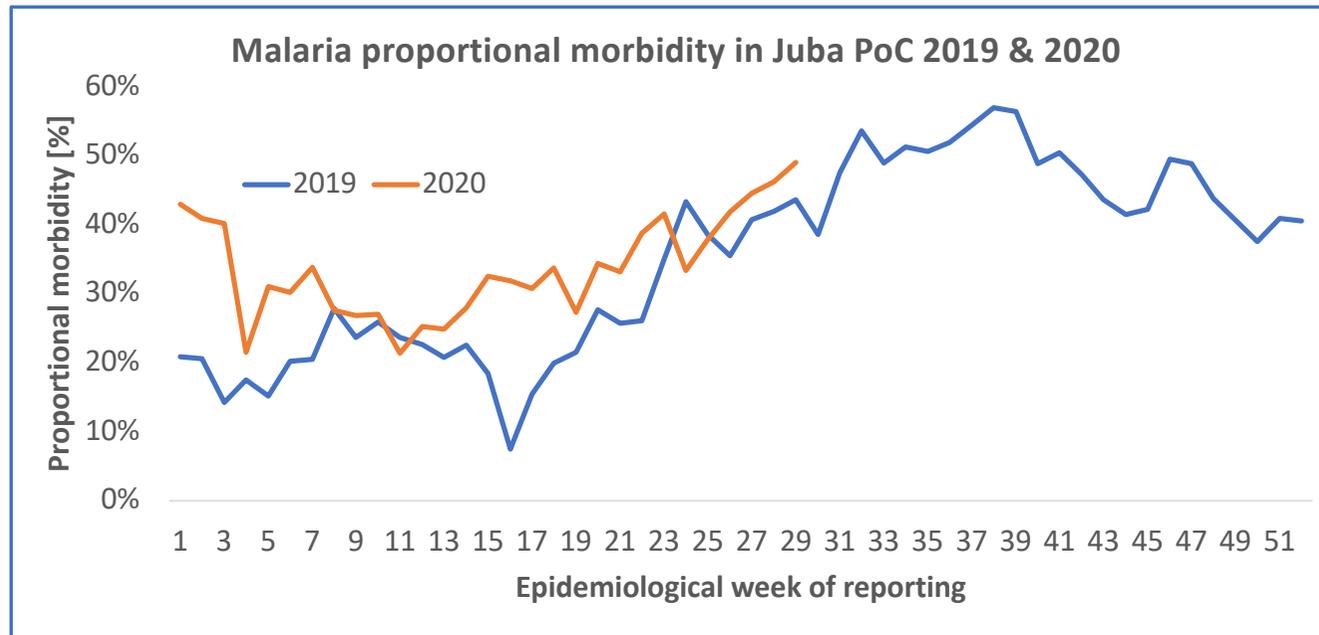

- Malaria is top cause of morbidity followed by ARI & AWD since wk 1, 2020
- Malaria currently accounts for 49% of the total OPD consultations
- ARI proportional morbidity is currently 11%

ARI trends in Juba PoC, 2019-2020

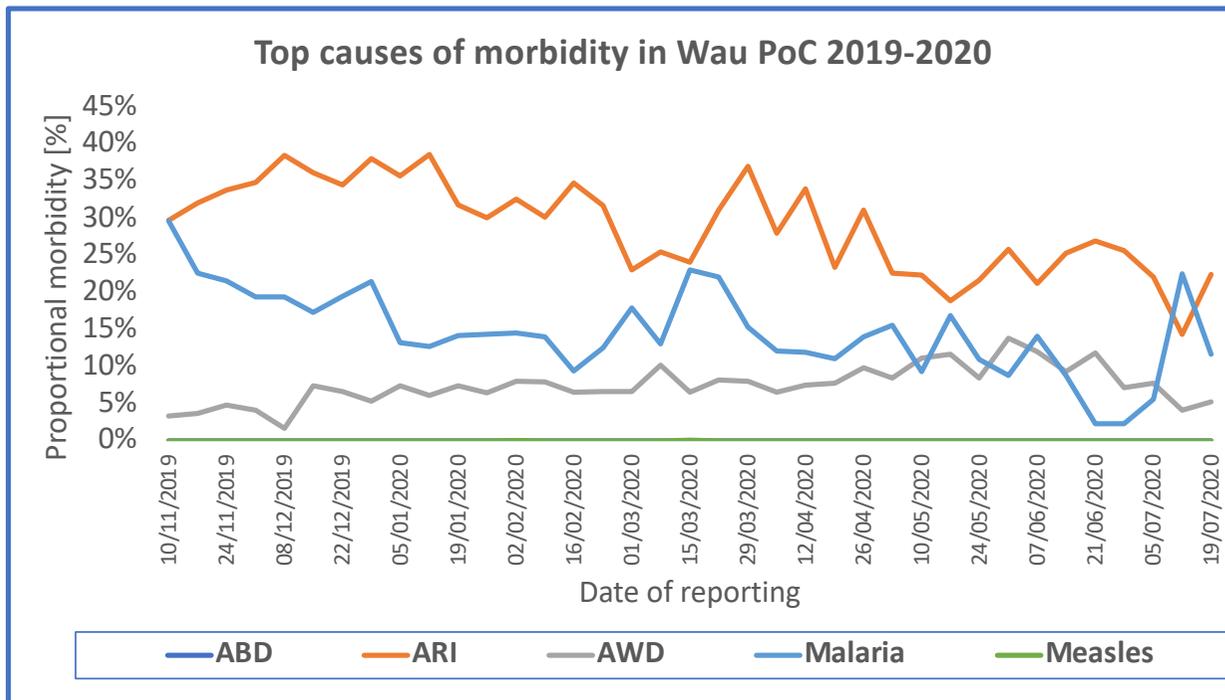

ARI proportional morbidity in Juba PoC in 2020 (11%) lower when compared to the corresponding period of 2019 (15%)

Malaria trends in Juba PoC, 2019-2020

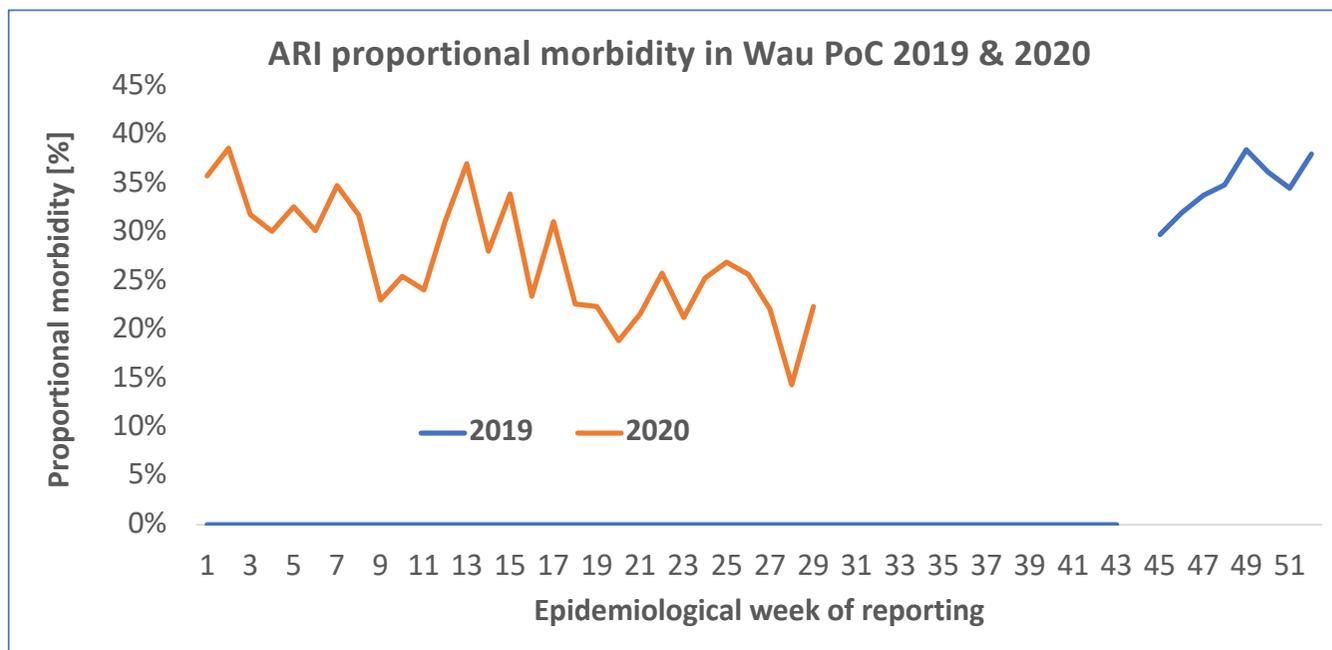

- Malaria cases in 2020 higher when compared to same period of 2019
- In wk 29, 2020 malaria accounted for 49% of OPD consultations when compared to 44% in wk 29, 2019; & 46% in week 28 of 2020.

Top causes of morbidity, Wau PoC, wk 29, 2020

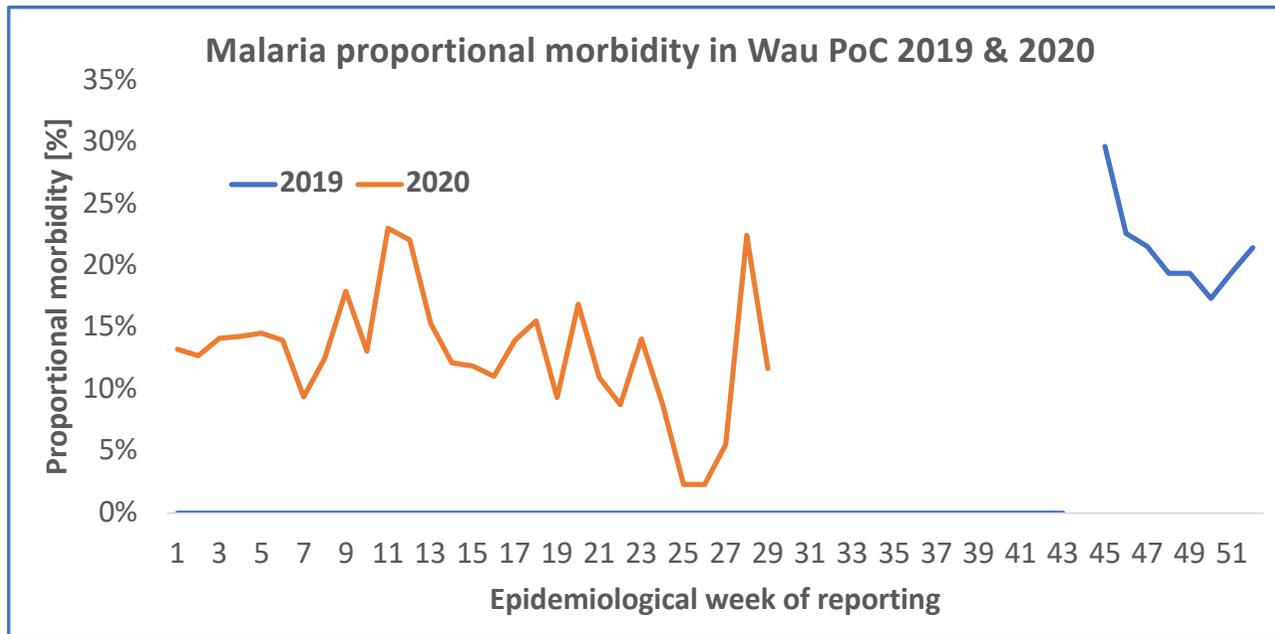

- ARI is top cause of morbidity followed by malaria & AWD since wk 1, 2020
- ARI currently accounts for 22% of the total OPD consultations
- Malaria proportional morbidity declined from 22% in wk 28, 2020 to 12% in week 29, 2020

ARI trends in Wau PoC, 2019-2020

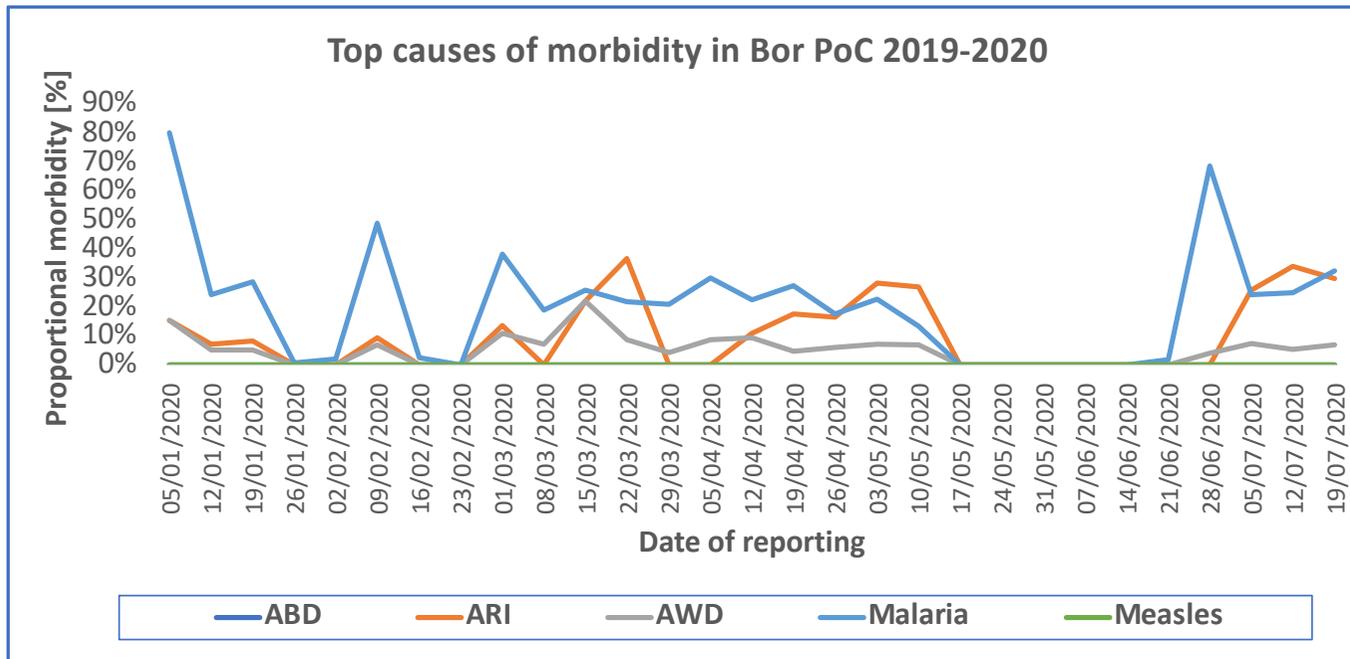

ARI proportional morbidity increased from 14% in week 28 of 2020 to 22% in week 29 of 2020.

Malaria trends in Wau PoC, 2019-2020

Malaria proportional morbidity reduced from 22% in week 28 of 2020 to 12% in week 29 of 2020

Top causes of morbidity, Bor PoC, wk 29, 2020

- Malaria is the top cause of morbidity in Bor PoC
- Malaria accounts for 32% of OPD consultations
- ARI accounts for 30% of OPD consultations

Mortality surveillance in Bentiu PoC

Week 29 of 2020

Mortality trends in Bentiu PoC 2019-2020

Number of ARI deaths Bentiu PoC, weeks 1-29, 2019 & 2020

Year	<5yrs	≥5yrs	Total deaths
2019	12	5	17
2020	13	28	41
Total deaths	25	33	58

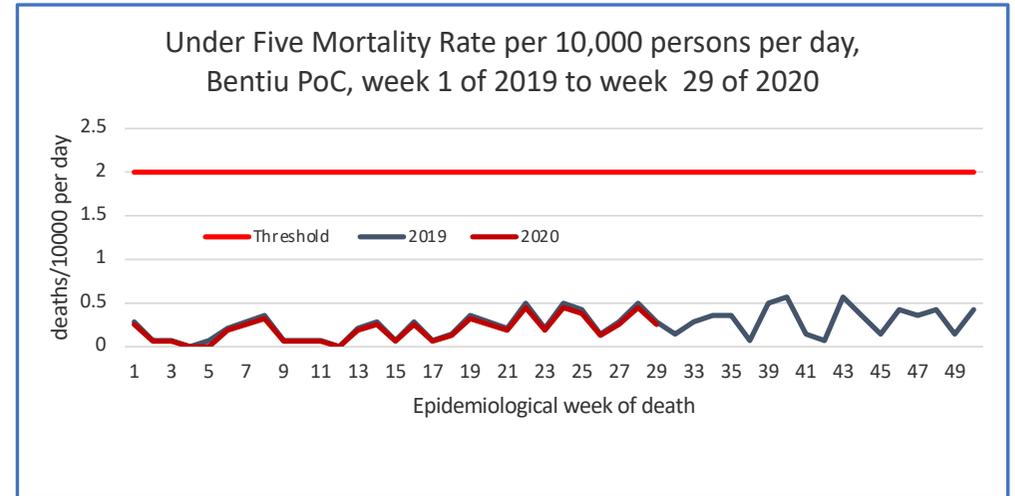

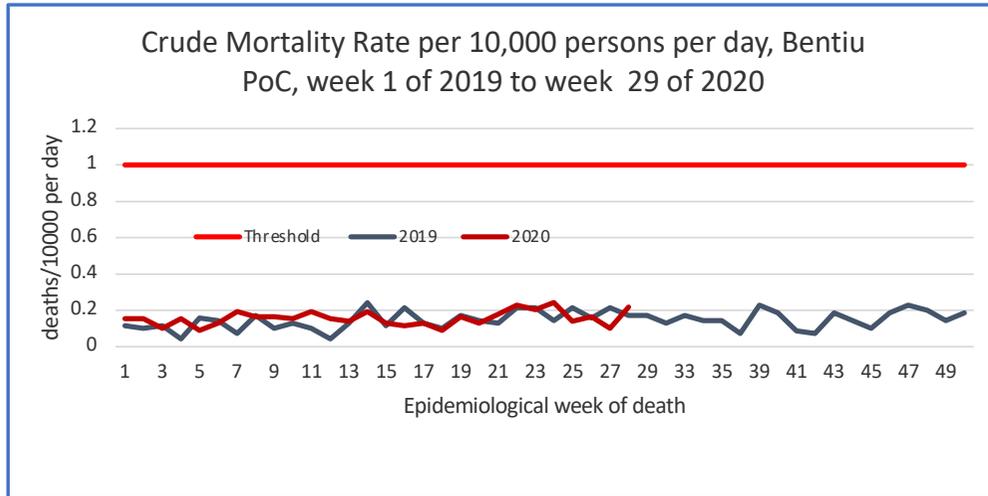

Higher number of ARI deaths reported from 1-29, 2020 when compared to the same period 2019

ARI Proportional mortality (%), Bentiu, weeks 1-29, 2019 & 2020

	≤5yrs	>5yrs	All ages
2019	14%	3%	6%
2020	11%	13%	12%

- ARI mortality is lower in 2020 when compared to 2019 in children <5yrs
- In individuals ≥5yrs; ARI mortality is higher in 2020 when compared to 2019

Mortality trends in Bentiu PoC 2019-2020

The Crude Mortality Rate - CMR) in 2020 is comparable to 2019 & below the emergency threshold of 1 death per 10,000 per day

The risk of death in children <5yrs of age (U5MR) in 2020 is comparable to 2019 & below the emergency threshold of 2 death per 10,000 per day

Mortality trends in Bor PoC 2020

#	Week in 2020	No deaths	Cause of death	Comments
1	22	1	ARI with dyspnoea	Not sampled
2	23	1	ARI with dyspnoea	Not sampled
3	25	1	Drowning	
4	28	1	Drowning	

- Bor PoC registered two ARI related deaths in week 22 & 23, 2020 but were not sampled
- The other two deaths in week 25 & 28 of 2020 were due to drowning

Conclusions

- Malaria cases have increased in Bentiu PoC; Juba PoC; & Bor PoC and is the top cause of morbidity in Bentiu PoC, Bor, & Juba PoC
- ARI is the top cause of morbidity in Malakal & Wau PoCs
- Mortality (CMR & U5MR) in Bentiu PoC & Bor PoC remain below the emergency thresholds
- ARI deaths in Bentiu PoC in persons ≥ 5 yrs higher in 2020 when compared to 2019 (However, only two ARI deaths in Bentiu PoC are attributed to COVID-19)

Recommendations

- Strengthen surveillance for COVID-19 and other IDSR priority diseases in the PoCs
- Strengthen implementation and adherence to public health social measures for COVID-19 prevention in the PoCs
- Strengthen malaria prevention & control including improved access to diagnostics; medicines; vector control (LLINs and larviciding); & BCC for malaria prevention
- Mortality line lists should be submitted by these PoCs – Juba; Malakal; Wau

Thank you
